

eTicketing Solutions

Convergence.net is a premier provider and technology leader in the rapidly expanding market of online ticketing and reservation services. Our eTicketing Platform is perfect for single or multi-venue attractions or events. Whether you are with a theme park, zoo, aquarium, museum, waterpark, arena, or special event, Convergence.net offers a complete online solution for your ticketing, registration, and group sales needs.

Our eTicketing platform can help you drastically increase online ticket sales while cutting operational and marketing costs. At last, one system can handle all your ticketing requirements for your various departments and activities:

eTicketing Types:

- ◆ General Admission
- ◆ Special Events
- ◆ Timed Tickets
- ◆ Memberships
- ◆ Season Passes
- ◆ Gift Certificates
- ◆ Program Registrations
- ◆ School Registrations
- ◆ Party Reservations

Our platform combines a main web store for sales to the general public with potentially thousands of private "affiliate" stores. These virtual stores allow dedicated pricing and ticket selection for group sales accounts, schools, and special sponsorships or promotional activities.

Our promo code engine supports zipcode-targeted promotions, member restricted promotions and direct mail tracking codes. We post to your merchant account for better cash flow, you own the customer data, and we can integrate with your current barcode and scanning scheme. For attractions without gate scanning system, Convergence.net offers barcode scanning from any client supplied internet-connected PC.

Benefits to Using Convergence.net eTicketing

Easy - Hosted solution with web-based management for reduced start-time and training

Scalable - Multi-venue and modular design allows adding new locations or product types with ease
